Company Name: Infinity Turbine LLC
 Product: Caster Beam
 Applications: Quick build modular beams for casters and structures.
 Construction: Metal or carbon fiber box beam with pre drilled holes for 3/8 inch bolts and 5 inch casters.
 Uses: Workbench, cart, table, prototyping.

Caster Beam Modular Pre Fabricated Structure

Since 2008 Infinity has been building hundreds of turbine and extraction systems all with metal frames. Instead of relying on welded one-use structures, Infinity devised a system to use bolt together beams which had pre drilled 3 inch access ports and 3/8 inch holes for a bolt together system. Beams also have pre drilled 3/8 bolt patterns for standard 5 inch diameter casters which all fast prototyping carts that hold processing equipment, tables, workbenches, and other structures.

Plans for sale and licensing available.
