Company Name: Infinity Turbine LLC
 Product: Caster Beam
 Applications: Quick build modular beams for casters and structures.
 Construction: Metal or carbon fiber box beam with pre drilled holes for 3/8 inch bolts and 5 inch casters.
 Uses: Workbench, cart, table, prototyping.

PDF Version of the webpage (first pages)

Caster Beam Modular Pre Fabricated Structure

Since 2008 Infinity has been building hundreds of turbine and extraction systems all with metal frames. Instead of relying on welded one-use structures, Infinity devised a system to use bolt together beams which had pre drilled 3 inch access ports and 3/8 inch holes for a bolt together system. Beams also have pre drilled 3/8 bolt patterns for standard 5 inch diameter casters which all fast prototyping carts that hold processing equipment, tables, workbenches, and other structures.

Plans for sale and licensing available.
