Company Name: Infinity Turbine LLC
 Product: Coni Turbine
 Applications: ORC, Compressed Air, Cavitation Water, Cavitation CO2, Cavitation Extraction with Water and More
 Construction: Aluminum, Stainless Steel, 3D Metal, or cast composites
 Uses: Organic Rankine Cycle miniature power production from waste heat. Extraction of oil from botanical cells in water. Cavitation of liquids to make steam, Silver nanoparticles production, and more.

Coni Turbine

The Coni Turbine is a disc with angled bores for basic low efficiency expansion of water, compressed air, and Organic Rankine Cycle working fluids. It can be run in reverse for cavitation of water or CO₂, for many applications including oil extraction from cells, production of silver nanoparticles, and more.
