Fast Vacuum Table

The Infinity Turbine vacuum table is designed for vacuum bagging materials and evacuating air. This process can be used for drying small wood parts, clamping (for glueing), hold-down, vacuum bagging for fiberglass or carbon fiber, removing excess glue or moisture, and even hooked up to a rigid chamber for vacuum drying small quantities of lumber. Plans for the vacuum table are \$199.00 and a unlimited production license is available for \$4,999.00 (you may put your own brand name on the unit with a license).
