

IMPULSE-REACTION TURBINE FOR SUPER EFFICIENT HEAT ENGINE

Simplified drawing showing the principle of operation:

(For explanation, see the text and legend for drawing #2)

Supplement to drawing #2:

NOTE: Only one stationary impulse nozzle #8 and two rotating reaction nozzles #5 are shown. The stationary nozzle ring #9 is omitted for better clarity.

INVENTOR: Frank Kandrnal, 3455 Emma Rd. Bellingham, WA 98226
